SOLUTION BRIEF

FiberVizion

Designed for fiber network operators, project managers, and infrastructure teams coordinating multi-segment builds, FiberVizion delivers near real-time visibility into every line, crew, vendor, and milestone. Instead of relying on spreadsheets, siloed dashboards, or static maps, FiberVizion brings it all together. Whether you're managing one city, state-wide or national expansion, it gives you the clarity, structure, and insight to stay ahead of the build—and in control.

Key Capabilities

■ **Segmented Line Tracking**
Monitor multiple fiber lines and segments across markets, vendors, and build types—from backbone to last mile.

■ **Progress & Delay Visibility**
Enter distance completed and visualize percent progress in dashboards to catch delays early.

■ **Cost & Crew Monitoring**
Track budgets, daily costs, and crew output in near real time to prevent overruns before they grow.

■ **Mapped Project View**
Map lines, edits, distances, and areas using ruler tools and overlays—no more static PDF plans.

■ **Program & Segment Orchestration**
Coordinate phased fiber builds - from vendors to locations - without delays or double work.

Why FiberVizion?

✓ Built for Fiber Infrastructure

✓ Modular by Design

✓ Quick to Deploy, Intuitive to Use

✓ Full Lifecycle Oversight

Key Benefits

Avoid Delays: Monitor active builds, compare progress to plan, and respond faster when things fall behind.

Control Deployment Costs: Track spend and productivity with live data—before overruns disrupt timelines.

Align Field and Office: One system ties crews, vendors, and programs together with mapped clarity.

See Real Progress: Visualize build status, segment completion, and coverage without waiting on reports.

Is FiberVizion Right for You?

If your day involves...

- Managing fiber builds across cities, regions, or multiple vendors
- Coordinating field progress with project or program schedules
- Using PDFs, inboxes, and spreadsheets to track segments
- Reporting on deployment status with stale or partial data
- Struggling to get clarity across distributed fiber operations

...then yes, FiberVizion was built for you.

"OneVizion is giving Lumen some very advanced capabilities when it comes to controlling construction projects on a very large scale... Lumen has signed some big deals recently that have been announced, and we have a need to partner with someone that's going to help us to deliver those effectively."

Kye Prigg │ EVP Enterprise Operations, North America at Lumen Technologies
