

OneVizion

Streamline Remote Operations With FieldVizion

With FieldVizion, you can drive process to your field workforce with absolute clarity. Ensure work is completed and data and documentation are collected, consistently, every time and for every project site. Then review and approve the deliverables in real time – BEFORE field personnel leave the work site. We purposefully built our mobile application around this specific intent.

You know the biggest threat to your projects is rework. Getting it right the first time is critical for field data collection and documentation. By standardizing and streamlining YOUR remote workflows in FieldVizion, you can reduce rework, produce high-quality deliverables, and protect your margins. With so many challenges to profitability in today's hyper-competitive market, you need a solution that serves your specific needs. **Download our native application today on your iOS or Android device through the App Store and Google Play.**

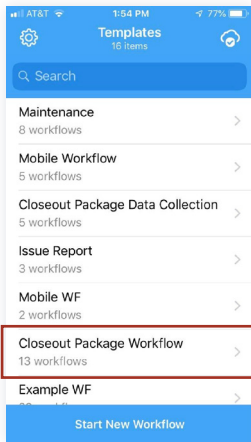

Advantages of FieldVizion:

- Define and standardize field workflows
- Save workflows as templates to deliver consistency across all similar projects
- Give crew leads a clear picture of the work assigned to them
- Collect data and push it to the OneVizion Platform in real time for review by a manager
- Automatically rename files to your customer's specifications as they are loaded
- Provide reference files for users in the field through configured workflows
- Collect data offline and automatically sync when you reconnect
- Status indicators show when your device is connected and if deliverables have been successfully uploaded
- Implement ad-hoc steps or collect ad-hoc data and files outside of preconfigured workflows

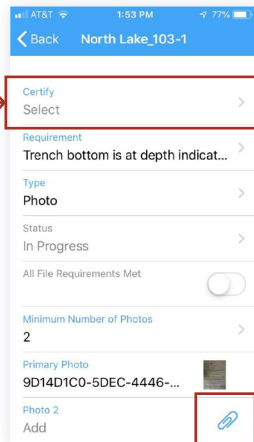

FieldVizion Use Cases

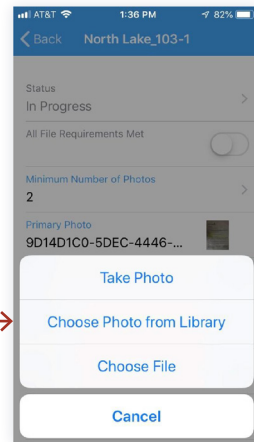

Provide field crews with standardized workflows to ensure accurate, consistent data collection:

Select the appropriate workflow

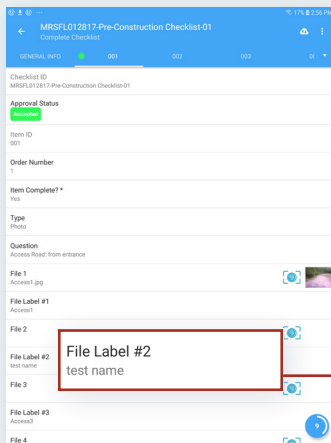

Requirements and fields are clearly laid out

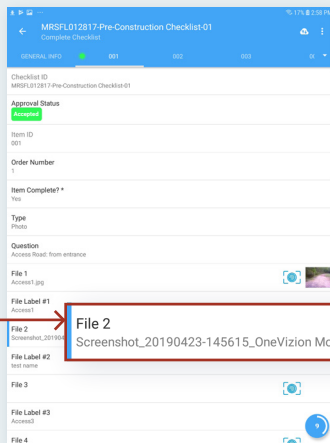

Easily populate fields with required data or documentation

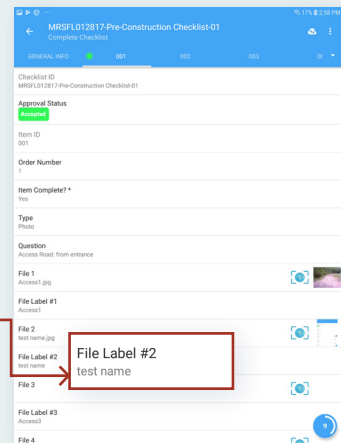

Automatically rename files when uploading in order to match requirements:

Admins can set predefined file names

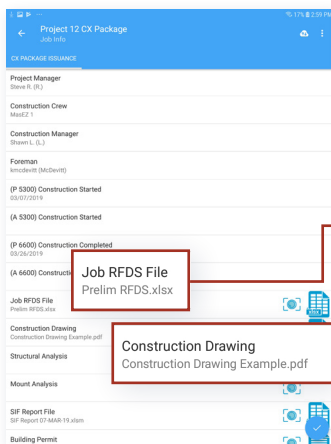

Field personnel can upload files with any name

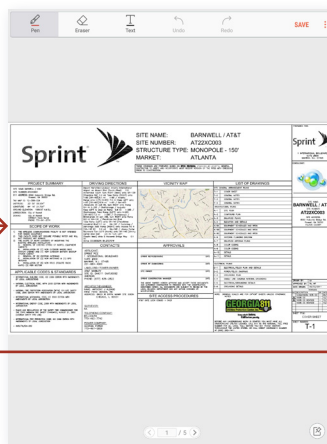

Files are automatically renamed to match your predefined file names

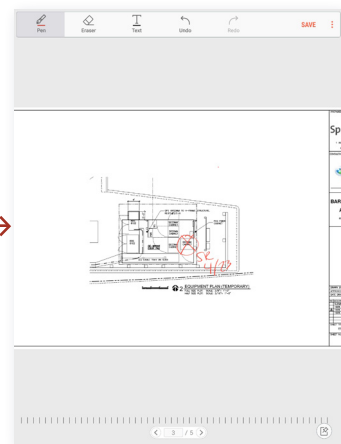

Easily provide reference files to FieldVizion users:

Provide reference files directly through the app

Field personnel access files through the configured workflow

Files can be marked up and resaved to the file field
